RESPONSIBLE INNOVATION

Why and What?

“If you can change the world by innovation today so that you can satisfy more of your obligations tomorrow, you have a moral obligation to innovate today.”

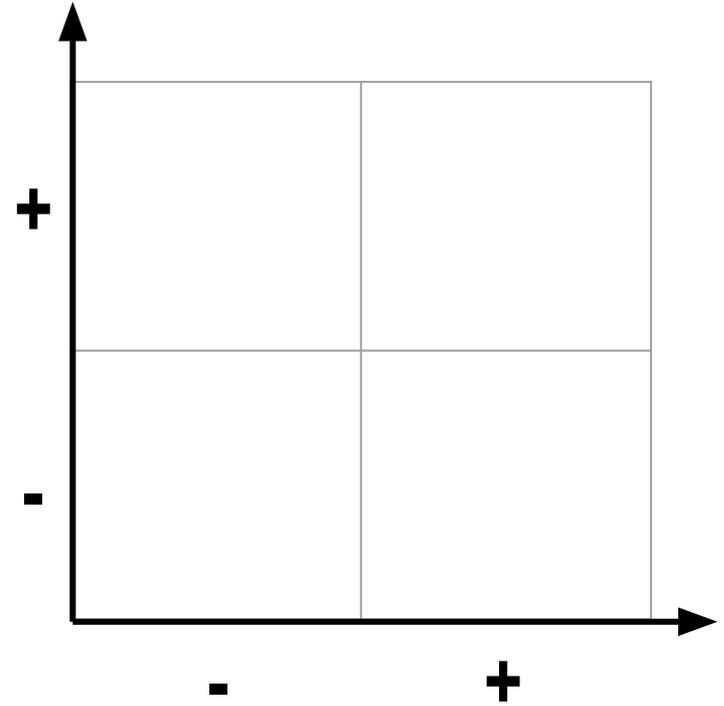

(Jeroen van den Hoven)

Responsible Innovation aims to take ethical and societal questions of innovation into consideration at an early stage in order to prevent failure and/or negative consequences.

COMPLEX SOCIETAL CHALLENGES

Learning Objectives

Lecture 1 : Complex Societal Challenges

- *Differentiate between simple from complex and/or wicked challenges;*
- *Identify and analyse a complex societal challenge;*
- *Recognise how to confront complex societal challenges.*

(BIG) DATA, BIG PROMISE

Learning Objectives

Lecture 2 : (Big) Data, Big Promise

- *Appraise the concept of (Big) Data and identify its components;*
- *Assess the challenges in applying new types of data for confronting complex societal challenges within the domain of peace and justice;*
- *Recognise and explain the potential of the data revolution for peace and justice.*

DATA-DRIVEN INNOVATION

Learning Objectives

Lecture 3 : Data-Driven Innovation

- *Appraise the concept of data-driven innovation and indicate its potential for peace & justice (incl. sustainable development and humanitarian action);*
- *Demonstrate the potential for data-driven innovation in confronting complex societal challenges.*

DATA-DRIVEN INNOVATION FOR NGO's

Defining Data-Driven Innovation

Universiteit
Leiden

SYSTEMATIC LITERATURE REVIEW

“Data-Driven Innovation is about finding new ways to use data and analytics to inform decision making, improve organisational processes and create new methodologies for solving (global) challenges.”

SEMI-STRUCTURED INTERVIEWS

additional aspects :

- (1) service provision*
- (2) organisational change*
- (3) data governance*

DATA-DRIVEN INNOVATION

Learning Objectives

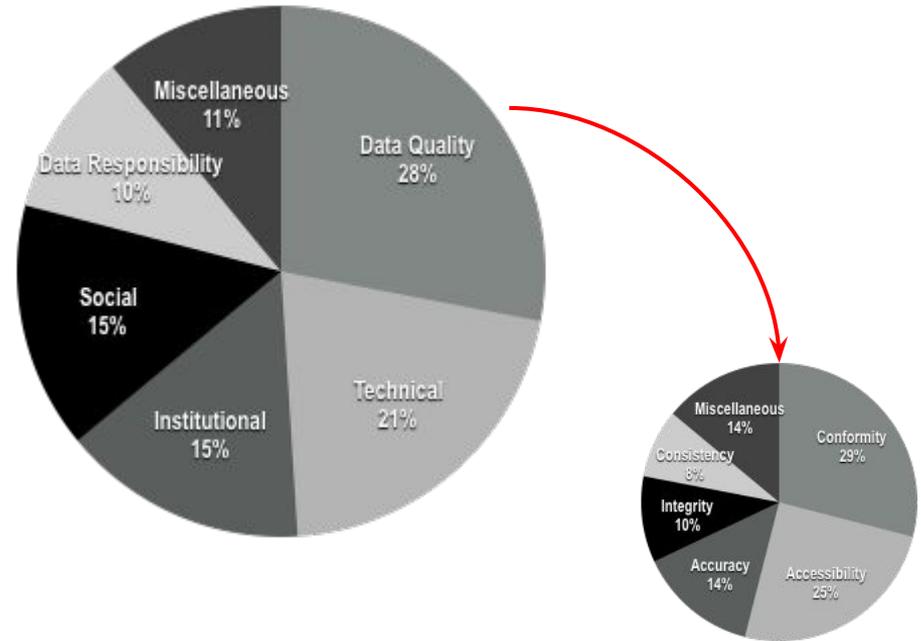

Lecture 4 : Innovators for Peace & Justice

- *Recognise different possibilities (in particular leveraging organisational data and citizen-reporting) for applying data-driven innovation within the humanitarian sector;*
- *Identify core challenges for organisations trying to apply and/or adept data-driven innovation to support their work towards peace & justice.*

DATA-DRIVEN INNOVATION FOR NGO'S

Semi-Structured Interviews

CHALLENGES FOR DATA-DRIVEN INNOVATIONS FOR NGO'S

DATA-DRIVEN INNOVATION FOR NGO'S

Preliminary Conclusions

(1) Data-Driven Innovation is conducted across various sectors of industry;

(2) NGOs are still at an entry level and indicate that they face diverse and fundamental challenges in implementing data-driven innovation - in particular reference to limited capacity, resources and knowledge;

(3) Cross-collaboration and learning from other sectors (i.e. information technology, education and service) could be beneficial to improve data for achieving and monitoring sustainable development.

TOWARDS A RESPONSIBLE DATA APPROACH

Introduction

Introducing and Defining Data Responsibility

- (1) *What does it mean?*
- (2) *What are the challenges?*
- (3) *What can we do?*

Objective: How to develop a responsible data approach?

DATA RESPONSIBILITY

Definition

INTRODUCTION DATA RESPONSIBILITY

*The continuous **process** of defining the **value proposition** and **risk potential** of the use of digital data in a project, and **maintaining an optimal balance** between the two by **limiting or altering data use** and/or implementing **risk mitigation strategies**.*

DATA RESPONSIBILITY

Woman journalist is decapitated by Mexican drugs cartel over comments she made on social networking site

By THE ASSOCIATED PRESS
UPDATED: 06:24 GMT, 26 September 2011

72 View comments

Police found a woman's decapitated body in a Mexican border city on Saturday, alongside a handwritten sign saying she was killed in retaliation for her postings on a social networking site.

CHECKING YOUR REPRESENTATIVITY

Where are the Women in Data?

Talking about A good education: Jordan

The globe spins to show the 20 countries that have proportionately talked the most about the highlighted Post-2015 topic on Twitter from August 2012 through July 2015.

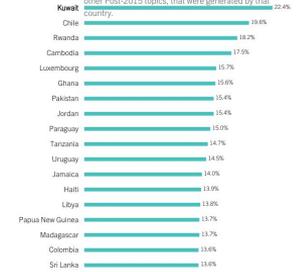

Pick a topic below

- A good education
- Access to clean water and sanitation
- Action taken on climate change
- Affordable and nutritious food
- An honest and responsive government
- Better healthcare
- Better job opportunities
- Better transport and roads
- Equality between men and women
- Freedom from discrimination
- Phone and internet access
- Political freedoms
- Protecting forests rivers and oceans
- Protection against crime and violence
- Reliable energy at home
- Support for people who can't work

Ranking

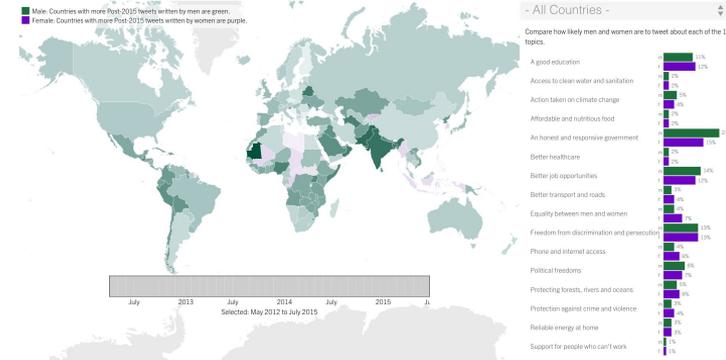

The ranking shows the countries with the highest proportion of tweets about the highlighted topic. The percentages refer to the proportion of tweets about the highlighted topic, in relation to tweets about all the other Post-2015 topics, that were generated by that country.

Gender Distribution

Choose a country or a group of countries to see differences in how likely men and women are to tweet about a particular topic relevant to sustainable development. If you hover over a bar in the bar chart on the right, you can see what words are most commonly used for each gender for each topic. Disclaimer: Gender distributions should not be seen as being indicative of general gender issues on Twitter. The data shown in this dashboard are only references, and only apply to this particular study.

- Male: Countries with more Post-2015 tweets written by men are green.
- Female: Countries with more Post-2015 tweets written by women are purple.

Police record three instances of anti-gay violence a week

Uncategorized     January 22, 2014

Police recorded 769 instances of violence against gay people between the beginning of 2009 and September last year, the equivalent of around three cases a week.

The figures come from a new police report which aims to establish a better picture of the extent of anti-gay violence in the Netherlands. Previous reports have focused on questionnaires.

The report states six out of 10 instances took place in Amsterdam, where police have been paying extra attention to the problem following several high profile cases.

Some 17% of cases reported involved threats of physical violence, 31% simply physical attacks and 6.7% serious attacks, the report shows. The rest were categorised as muggings and fights.

Men were the victims in 84% of cases.

EXPERIMENTATION GONE ROGUE

Facebook

The Anti-Social Network

By helping other people look happy, Facebook is making us sad.

By Libby Copeland

There are countless ways to make yourself feel lousy. Here's one more, according to research out of Stanford: Assume you're alone in your unhappiness.

"Misery Has More Company Than People Think," a paper in the **January issue of *Personality and Social Psychology Bulletin***, draws on a series of studies examining how

college students evaluate moods, both their own and those of their peers. Led by Alex Jordan, who at the time was a Ph.D. student in Stanford's psychology department, the researchers found that their subjects consistently underestimated how dejected others were—and likely wound up feeling more dejected as a result. Jordan got the idea for the inquiry after observing his friends' reactions to Facebook: He noticed that they seemed to feel particularly crummy about themselves after logging onto the site and scrolling through others' attractive photos, accomplished bios, and chipper status updates. "They were convinced that everyone else was leading a perfect life," he told me.

DATA RESPONSIBILITY

Process (I)

Step 1

*Define your process, i.e. how do you work with data?
(data lifecycle)*

Step 2

Assess potential vulnerabilities (hazards).

Step 3

Understand risk factors.

Step 4

Define risk mitigation strategies.

DATA RESPONSIBILITY

Process (2)

Step 5

Learning - as the possibilities of data analytics grow, so does uncertainty about potential risks. Learning from mistakes is essential for keeping your data responsibility strategy up to date.

UNDERSTANDING RISKS

Different Risk Types

Various types of risk to keep in mind along the data lifecycle:

- Systems (technical infrastructure)
- People (e.g. insufficient training)
- Organisation (e.g. data analysis results too easily taken as true)
- Network (risks caused by partners e.g. data providers)
- Strategy (e.g. insufficient attention for data collection, partnerships to acquire new data)

UNDERSTANDING RISKS

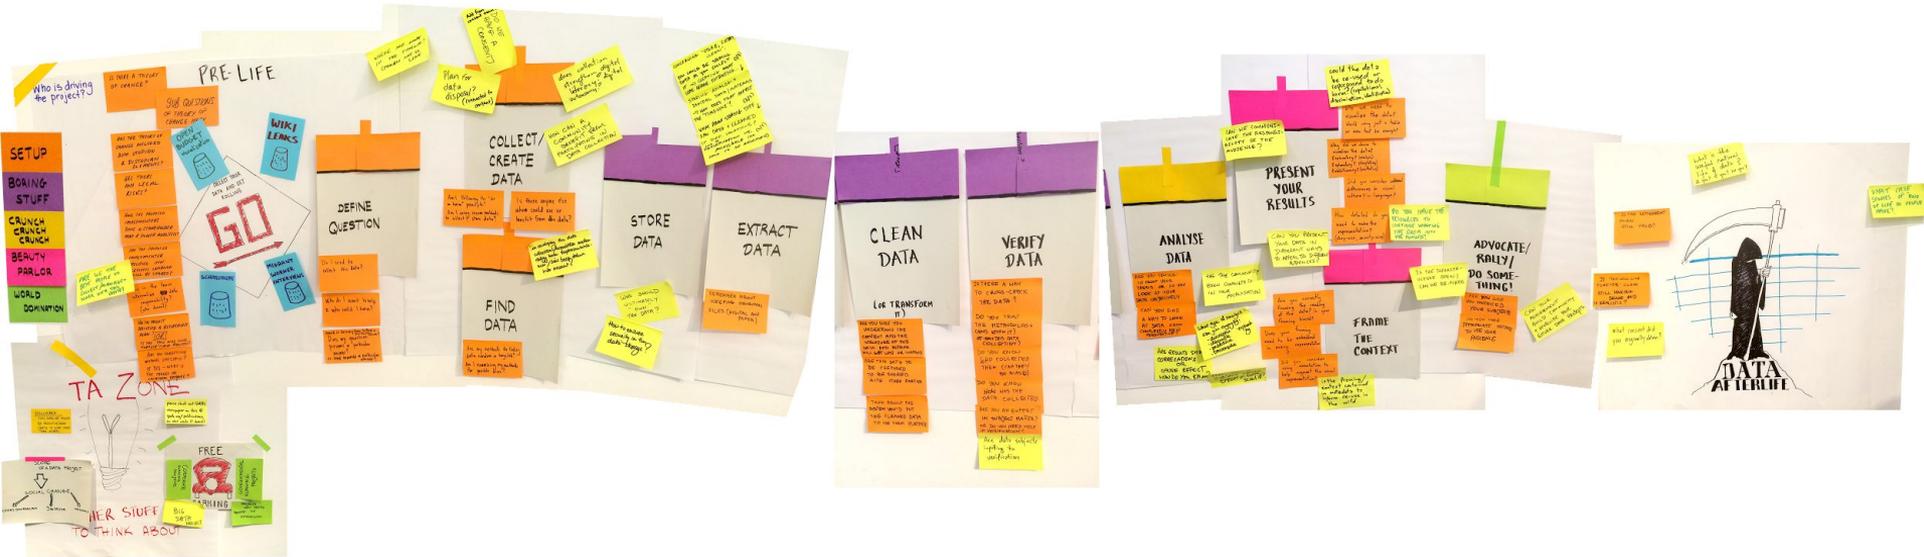

Different Mitigation Types

Several types of mitigation strategies:

- Systems (boost cybersecurity, introduce technical use/sharing limitations)
- People (invest in training, workshops, give time to learn how to work with the tool)
- Organisation (clarify roles and responsibilities of different units, create M&E mechanism / oversight / review board)
- Network (define standards for which partners to work with)
- Strategy (raise data-awareness among leadership)

DATA RESPONSIBILITY

Data in the Project Lifecycle
