

# Life Fair Performance – Top or Flop

September 26th 2016, 11:00h-11:45h.

- I. With this assignment, you're going to assess the technological innovation within your Life Fair theme. Using the following steps you will learn how scenarios are tools for Constructive Technology Assessment.
  - II. Choose two values that play a big role within your theme. The two values need to be independent of each other.
- 
- 

- III. Place the two values on the axes near the arrowpoint.

- IV. Think of ways the values could have affected society in the most extreme ways, good and bad. Formulate names for your Top scenario and your Flop scenario.
- V. Think of a location where your scenarios will take place. Look for a picture of such a location and upload this to your Chapter 3 theme leader.
- VI. Prepare a 3 minute play per scenario which (some of) you will act out in front of the class. Be ready to perform at 11:45h.
- VII. When preparing your scenarios, also consider which rhythms in society are affected in that scenario. Implement these while acting out the scenarios and name them explicitly after your performance.
